SOLVENCY II

Markets in Financial Instruments Directive II (MiFID II) is set to considerably expand the scope of reporting requirements, imposing new obligations on investment firms, particularly in the areas of trade and transaction reporting, best execution, and commission management. Obliging firms are required to report on nearly all instruments traded on regulated markets, Multilateral Trading Facilities (MTFs), Organised Trading Facilities (OTF) and financial instruments whose underlying component is admitted to trading on such venues.

Talk to our experts to understand how DataTracks' MiFID II transaction reporting solution can assist you.
