Top Essential Features of Rainbow

Automation

DataTracks Rainbow™ seamlessly integrates with your existing ERP or accounting systems for direct flow of data

Multiple Input Capabilities

DataTracks Rainbow™ accepts inputs in Word, PDF and Excel formats. It also accepts iXBRL outputs of industry leading reporting platforms

Collaboration

Within DataTracks Rainbow™, users can create multiple sections and work with various stakeholders concurrently.

Data Access Control

Manage access across different levels, including entity, document, and specific document sections. Additionally, govern the authorization levels assigned to each user

Roll-Forward

Save up to 70% of your time by avoiding duplication of efforts and achieve consistency of XBRL tags.
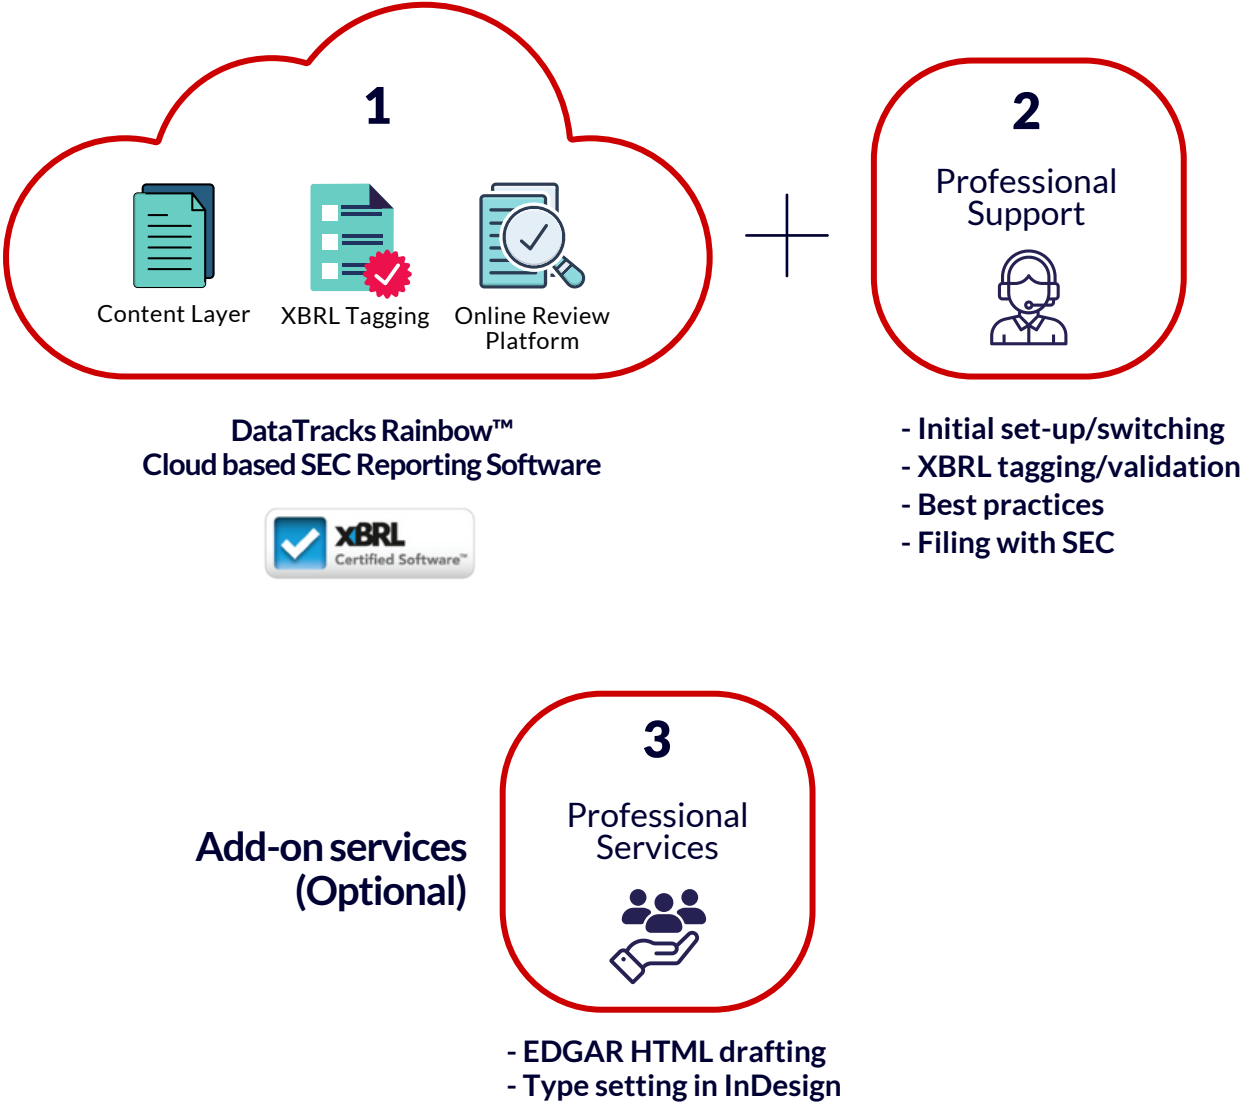

Review Platform

Use our sophisticated online review platform, to review, comment, validate, and sign-off on the XBRL file prior to filing
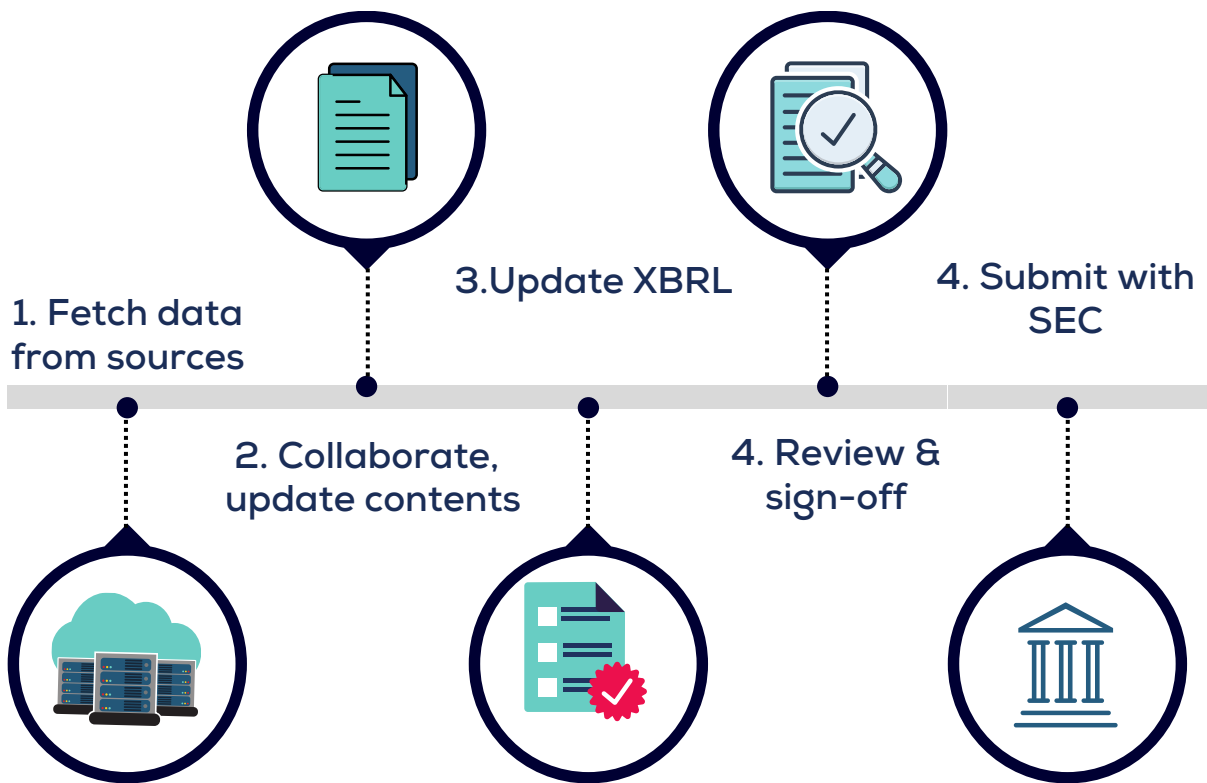

Audit Trail

With DataTracks Rainbow™, users are ensured of all logs for enhanced and transparent compliance.
