Top Essential Features of Rainbow

Automation
DataTracks Rainbow™ seamlessly integrates with your existing ERP or accounting systems for direct flow of data

Spreadsheet
Simplifies the management of financial data directly within the solution thereby users can seamlessly link external spreadsheets to documents within Rainbow, facilitating smooth content management and updates

Multiple Input Capabilities
Accepts inputs in Word, PDF and Excel formats. It also accepts iXBRL outputs of industry leading reporting platforms

Collaboration
Teams can work together on documents at the same time by splitting them into sections. Collaboration tools like track changes, comments, and version history keep everyone on the same page.

Data Access Control
Manage access across different levels, including entity, document, and specific document sections. Additionally, govern the authorization levels assigned to each user

XBRL Tagging
Features an advanced XBRL module equipped with a proactive validation mechanism, guaranteeing a minimal learning curve for users

Roll-Forward
Save up to 70% of your time by avoiding duplication of efforts and achieve consistency of XBRL tags.
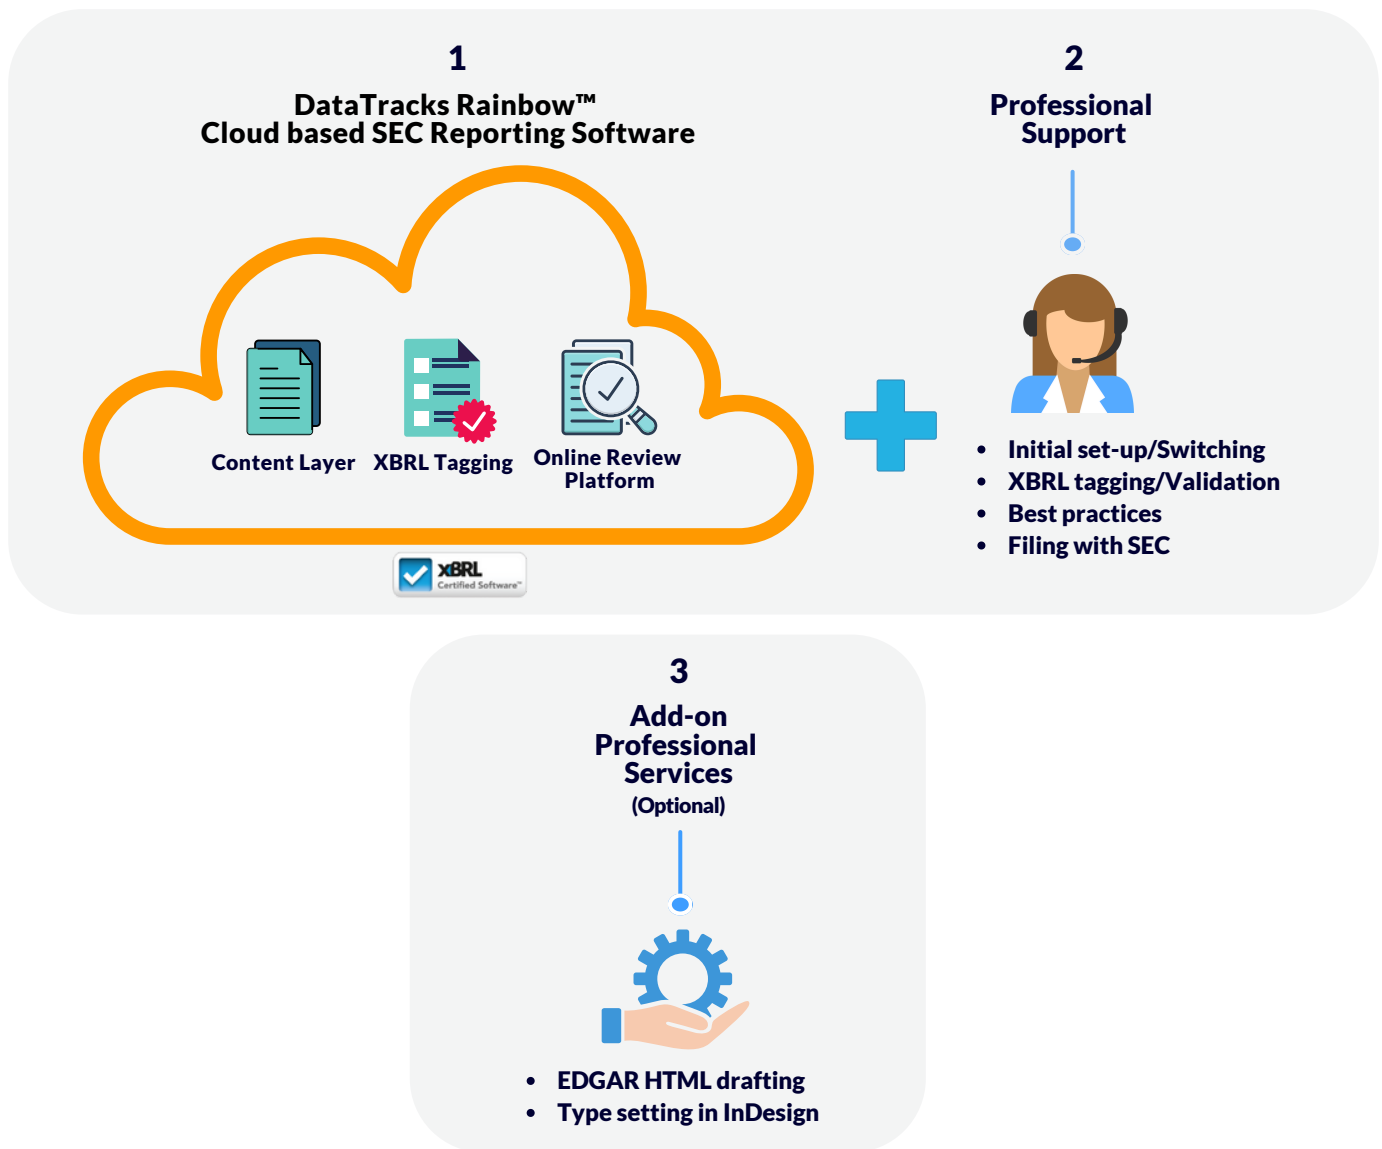

Review Platform
Use our sophisticated online review platform, to review, comment, validate, and sign-off on the XBRL file prior to filing

Audit Trail
A complete record of all document activity is provided for a transparent audit trail, ensuring compliance and user accountability.
